This Term we will be trialing a new form of programing for the children at HOOSH. We will be running skill based programs that extend over a five-week period where children will develop and learn life skills and cultural appreciation over the course of the five weeks.

Due to the nature of this program, cultural and celebratory events will be celebrated on the Monday of each week, regardless of the national/internationally recognised date, to ensure that we are recognising all of the significant events across the term. These events will be promoted and displayed within the centre across the week and the day will change the following term to ensure that all children are being exposed to these events.

The programs have been developed by the educators at HOOSH based on children's interests and parent's requests. If you have any ideas about programs that you would like to see run, please let us know!
